# TorrentSeries™

**Fountain & Surface Aeration  
Launching in Summer 2026**

## **Introducing the TorrentSeries**

The TorrentSeries is the next generation of aerating fountains and surface aerators engineered for unmatched performance in shallow-water environments. Designed to operate in as little as 18" of water, these ½–1 HP systems combine high-volume water movement with exceptional oxygen transfer. Built with marine-grade brass endbells, long-lasting motors, and quality yet affordable light kits, the TorrentSeries delivers the next evolution of Airmax innovation, providing efficiency, durability, and real-world performance you can count on.

**LakeSeries 5 HP**

**LakeSeries 10 HP**

## Fountain Aeration

Fountains create a beautiful attraction, adding the sights and sounds of moving water to your pond or lake. In addition, fountains aerate the water by increasing water circulation and oxygen saturation. Airmax fountains are designed and built for superior performance, long-lasting durability, low maintenance, and the best-in-class energy efficiency. Airmax has the largest, most defined spray patterns, allowing you to create stunning displays.

A tall, narrow fountain spray in a pond surrounded by trees. The water is clear and the spray is well-defined. The background consists of a dense line of green trees under a blue sky with light clouds.

LakeSeries 2 HP

## EcoSeries™ 1/2 HP Fountain

### Fountain Kits Include:

- 3 Spray Patterns: Classic, Trumpet, Crown & Trumpet
- Energy Efficient, Fully Sealed, UL Approved Motor
- 115v Plug & Play Control Panel with Two Digital Timers for Fountain & Optional Lights
- Power Cord with Strain Relief
- 3 Year Warranty

### Unmatched Efficiency, Effortless Installation

Designed for stunning looks, vital aeration, and best-in-class efficiency, the Airmax EcoSeries 1/2 HP fountain outperforms other 3/4 and 1 HP fountains with a fraction of the energy consumption. Built with the pond owner in mind, no tools are required for the installation and the changing of nozzles. 24" minimum operating depth. Larger ponds will require the addition of diffused aeration or multiple fountains.

## NEW COMBO!

### EcoSeries with 3 Light Combo

Our most popular 1/2 HP fountain now comes packaged with a full RGBW 3-light set, an excellent value for dependable performance and beautiful nighttime displays

- 651731** 1/2 HP Fountain with RGBW 3 Light Set, 100' Cord \$2,999.99
- 651732** 1/2 HP Fountain with RGBW 3 Light Set, 150' Cord \$3,349.99

## PondSeries® 1/2, 1 & 2 HP Fountain

### Fountain Kits Include:

- 3 Spray Patterns: Classic, Trumpet, Crown & Trumpet
- Energy Efficient, Fully Sealed, UL Approved Motor
- 115v or 230v Control Panel with Two Digital Timers for Fountain & Optional Lights
- Underwater Quick Disconnect
- 3 Year Warranty

### Industry Leading Fountain Display Aerators

The Airmax PondSeries fountain is built and engineered for superior performance and long-lasting durability. The patent-pending, high-flow design is meant to showcase stunning, crisp spray patterns, providing a beautiful aerating display. The maintenance-free, energy efficient motor utilizes an innovative cooling shroud design, forcing all water across the motor for maximum cooling and motor longevity.

## LakeSeries® 2, 3 & 5 HP Fountain

### Fountain Kits Include:

- Energy Efficient, Fully Sealed, UL Approved Motor
- 230v 1 PH or 460v 3 PH Control Panel with Two Digital Timers for Fountain & Optional Lights
- Power Cord with Strain Relief
- Underwater Quick Disconnect
- 5 Year Warranty

### Premium Engineering for High-Performance Fountains

The Airmax LakeSeries Fountains are the industry's premier fountain line, stepping up in class with higher horsepower options, larger spray patterns, and exclusive design. LakeSeries fountains are engineered for superior performance and long-lasting durability. The maintenance-free, energy-efficient motor utilizes an innovative cooling shroud design, forcing all water across the motor for maximum cooling and motor longevity. The Independent Stability Pontoon (ISP) Float System's innovative design allows for greater horsepower fountain displays with maximum stability and balance during fountain operation.

## LakeSeries® 7.5 & 10 HP Fountain

### Fountain Kits Include:

- Energy Efficient, Fully Sealed, UL Approved Motor
- 230v 3 PH or 460v 3 PH Control Panel with Two Digital Timers for Fountain & Optional Lights
- Power Cord with Strain Relief
- Underwater Quick Disconnect
- 5 Year Warranty

### Professional-Grade Design for Maximum Height, Scale & Stability

Airmax has further expanded our fountain lineup by launching the innovative LakeSeries 7.5 HP and 10 HP models. These fountains represent our largest units to date, delivering impressive height and scale. Featuring the twin ISP Float System for unmatched stability and tool-free installation, LakeSeries fountains are the lightest and most compact large horsepower options available, eliminating the need for bulky equipment and extensive manpower. With quick and easy installation requiring only 1-2 technicians and no heavy machinery, the LakeSeries offers convenience, efficiency, and performance never seen before.

## Pond & Lake Diffused Aeration

Airmax, The World's Best Aerator: The most effective, quiet, efficient and easiest to install. Aeration adds valuable oxygen to a pond or lake, particularly on the pond's bottom where muck and organic debris accumulate. A properly sized aerator works from the bottom up to ensure all areas of the pond are circulated and saturated with dissolved oxygen, leaving you with a cleaner, clearer and biologically balanced pond.

## Airmax Assist™ Results Guaranteed!

### AERATION MAPPING SERVICE THE RIGHT SYSTEM FOR THE PERFECT POND!

#### LET A CERTIFIED AIRMAX INSTALLER DESIGN THE RIGHT SYSTEM FOR YOUR POND OR LAKE!

Selecting the right system as well as determining the proper placement of the diffusers is vital to ensuring you are circulating and aerating your pond or lake effectively. Incorrectly placing diffusers or using an undersized unit limits the overall effectiveness of an aeration system. The Airmax Assist™ mapping service ends the guesswork. When a Certified Installer uses Airmax's proprietary software to map your pond or lake, not only will the installer stand behind the installation, but Airmax will guarantee the results!

#### HERE IS HOW TO GET YOUR LAYOUT:

Visit [www.airmaxeco.com/airmax-assist](http://www.airmaxeco.com/airmax-assist) and complete a short survey. Airmax will run this information along with input from your local Certified Installer through the Airmax Assist proprietary software to create a complete pond profile, detailed aeration placement map and a management plan.

Direct Burial Size (inch)	Direct Burial Length (feet)	Weighted Airline Size (inch)	Weighted Airline Length (feet)
5/8	120	3/8	70
5/8	150	3/8	135

System Specifications	Value
Surface Acres:	33
Average Depth:	7
Acres Feet:	2.31
Deepest Diffuser Depth (feet):	15
Perimeter (feet):	490

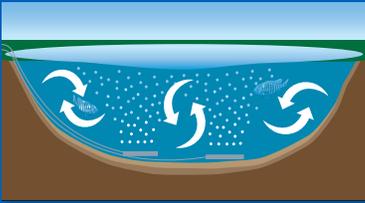

Total Volume (gallons):	500,000
Calculated Site Turnovers / 24hrs:	20.02
Estimated System PSI:	159

## Why Pond Depth Matters

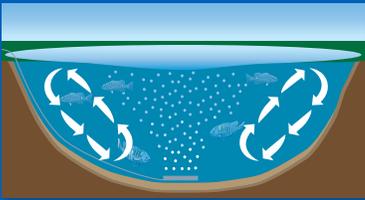

The deeper a diffuser plate is placed in your pond, the more area it can effectively aerate. Shallow ponds, or ponds with irregular shapes and bends, require more diffuser plates per surface acre.

## Shallow Water Pond

In shallow ponds, the column of diffused air is not able to "open" as far, which limits the effective area of each plate. The bends and curves in irregular shaped ponds block the circulation provided by an aeration system, which creates the need for more plates to reach isolated sections of your pond.

## Deep Water Pond

As diffused air leaves the diffuser plate, it rises to the pond's surface in a V pattern, creating a current. The higher this pattern is able to rise, the wider it becomes, which allows it to circulate a greater volume of water.

## Shallow Water Series®

### System Features:

- Perfect for shallow ponds up to 6' deep
- Single systems can aerate up to 1/2 acre
- ETL Electrical Safety Certification
- Extremely efficient, costs as little as \$3.60/month to run 24/7
- Available in 115v

## PondSeries®

### System Features:

- Perfect for ponds or small lakes up to 50' deep
- Single systems can aerate up to 6 acres
- ETL Electrical Safety Certification
- Extremely efficient, costs as little as \$13.20/month to run 24/7
- Available in 115v or 230v

## LakeSeries®

### System Features:

- Perfect for ponds or large lakes up to 50' deep
- Single systems can aerate up to 12 acres
- ETL Electrical Safety Certification
- Available in 115v or 230v

## SolarSeries®

### System Features:

- Two American-made solar panels
- Direct Drive or Battery Backup Systems
- EasyMount Assembly
- Two ProAir 2 diffusers and SilentAir compressor
- Can operate up to 24 hours
- \$0.00 cost per month

# **Proven Solutions. Scientifically Backed.**

**Natural treatments formulated, tested,  
& verified for real-world pond and lake conditions.**

## **Rooted In Microbiology.**

Each Airmax Natural Treatment is field-tested in diverse conditions, and analyzed by our laboratories to ensure consistent performance. From nutrient reduction to muck control and improved clarity, our solutions deliver measurable, repeatable results that professionals rely on season after season.

# Airmax Field Studies

## EcoBoost® PRx

### Phosphate Control Study – Rochester Hills, MI

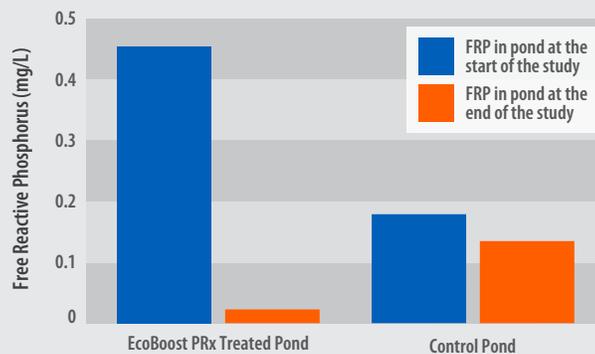

**CHALLENGE:** Located in Rochester Hills, Michigan, two ponds (0.5 and 1.2 acres, 9 ft deep) were suffering from years of neglect and receiving a large amount of runoff from the surrounding area.

**SOLUTION:** Biweekly treatments of PRx were applied by boat sprayer to the 1.2 acre pond over 16 weeks, leaving the 0.5 acre pond as a control. Water samples were taken to an independent laboratory throughout the summer for monitoring.

**RESULTS:** At the end of 16 weeks, results showed the pond treated with PRx reduced FRP by 98%. Not only did PRx limit external loading, but it prevented internal loading from affecting the waterbody. PRx application led to the treated pond being significantly clearer compared to the control.

**FULL STUDY:** To see the complete study, please visit [www.airmaxeco.com](http://www.airmaxeco.com)

**Free Reactive Phosphorus (FRP) Test vs Control**

## MuckAway®

### Muck Control Study – Rochester Hills, MI

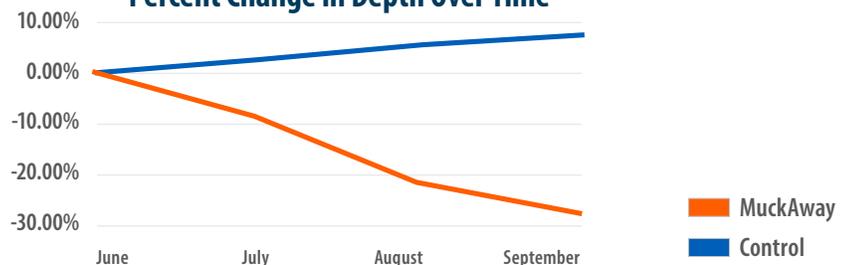

**CHALLENGE:** Located in Rochester Hills, Michigan, two ponds were chosen due to a long history of organic growth and heavy pond muck. Both ponds measured 0.75 acre, 10' deep and were eutrophic, stagnant environments used primarily for storm water retention.

**SOLUTION:** MuckAway Pellets were applied per labeled directions to one of the 0.75 acre ponds over a period of 16 weeks. The other 0.75 acre pond was left as a control. Average muck depths were recorded using systematic sampling within 16 area frames on a monthly basis. Samples were submitted to an independent laboratory for analysis.

**RESULTS:** At the end of 16 weeks, the treated pond showed greater than a 28% reduction in sediment depth. Laboratory analysis also revealed a significant reduction in Percent Organic Content, over a 25% difference between the treated and control pond. The control pond continued to accumulate additional sediment depth, nearly 8%, during the study period.

**FULL STUDY:** To see the complete study, please visit [www.airmaxeco.com](http://www.airmaxeco.com)

**Percent Change in Depth Over Time**

# PondClear™

## Pond Clarifying Natural Bacteria

- Natural Bacteria, Enzymes & Phosphate Binder
- Improves Water Quality & Controls Odors
- Binds Phosphates for Long-Lasting Water Clarity

PondClear PRO is the industry-leading, most effective, proven solution in water clarity. Developed from over 20 years of research and comprehensive field studies, PondClear PRO highly concentrated beneficial bacteria work by consuming suspended organics and binding phosphates to deliver clean water and eliminate noxious odors.

# MuckAway®

## Muck Reducing Bacteria

- Eliminates up to 2 Inches of Muck Each Month
- Proven Results in Laboratory and Field Studies
- No Water Use Restrictions

MuckAway PRO is the industry leading, most effective, proven solution in muck reduction. Developed from over 20 years of research and comprehensive field studies. The highly concentrated bacteria formulation rapidly consumes muck, converting it to an odorless gas that escapes unnoticed out of the water column.

# EcoBoost® PRx

## Natural Phosphate Control

- All-Natural Phosphate Binder
- Clarifies Water Without Impacting pH
- Eliminates the Need for Heavy Metal Treatments
- Permanently Binds Phosphates Improving Water Quality & Clarity

EcoBoost PRx is a proprietary blend of naturally occurring phosphate binders designed to permanently bind free reactive phosphorus (FRP). Natural phosphate binders work within the water column to clear up cloudy or murky water resulting from storm runoff, chemical fertilizers, and organic decomposition.

## Weed Razer®

### Mechanical Weed Control

#### Cut It.

These unique V-shaped weed cutters with razor-sharp blades are made to cut or shear just about any type of rooted aquatic vegetation such as milfoil, lily pads, pond weeds and even cattails.

**Item Number: 580110 | MSRP: \$169.99**

## Weed Raker™

### The Original Weed & Algae Rake

#### Remove It.

Get to the root of your lake or pond weed problem with the longest, widest, deepest aquatic rake in the industry. These sturdy tines dig deep into the sediment to remove roots and bottom-growing algae.

**Item Number: 580111 | MSRP: \$149.99**

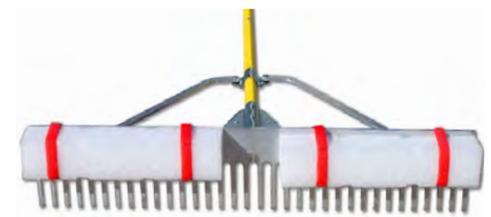

## Razer Rake™

### 3-in-1 Collapsible Pond & Beach Rake

#### Remove It.

This 36" wide, versatile rake assembles easily with push button snap connectors. The razor-sharp teeth make it perfect for digging, cutting and mechanical removal of weeds, algae, muck and debris.

**Item Number: 580130 | MSRP: \$129.99**

**New!**

# Swifter Sifter™

## Multi-Purpose Pond & Lake Skimmer

**Remove It.**

The Swifter Sifter pond skimmer is made of rigid, rust-proof aluminum and stainless steel for durability and clog-resistance. Each pass hauls in roughly three cubic feet of debris with ease.

**Item Number: 580137 | MSRP: \$299.99**

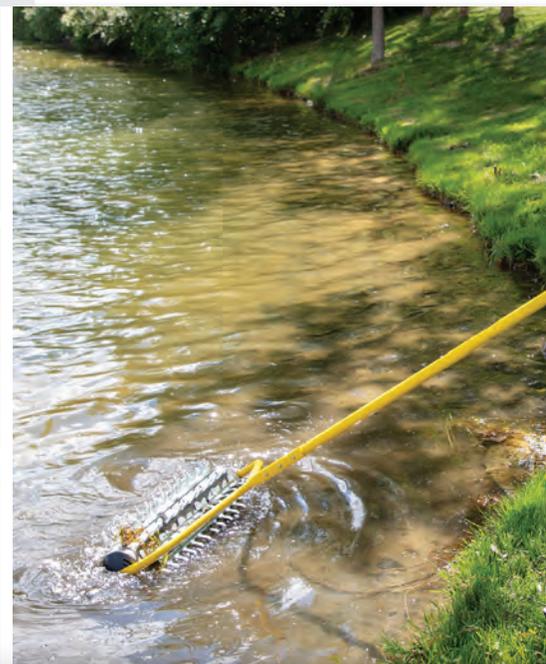

# Muck Razer™

## The Ultimate Underwater Tiller

**Prevent It.**

Designed with hooked teeth made of galvanized steel, the Muck Razer will help reduce muck and dig out the roots of aquatic weeds, giving you clean, weed-free swimming and beach areas.

**Item Number: 580136 | MSRP: \$299.99**

# Aeration

## Parts & Accessories

### Remote Manifold Kit

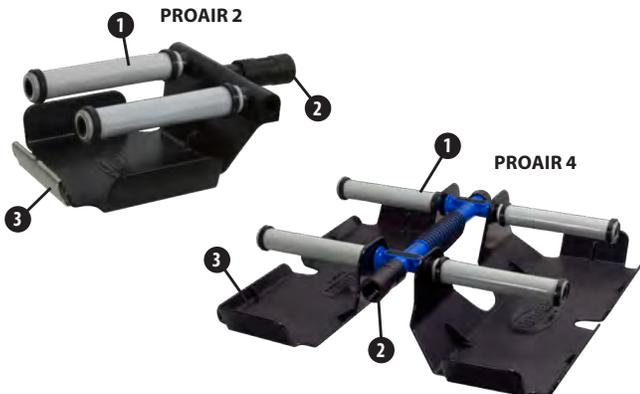

Designed for aeration installations where the power source is away from the pond's edge, the Remote Manifold Kit allows for a single run of direct burial airline from the power source to the pond.

This gives you the ability to make airflow adjustments pond side so you can remain in view of the diffusers. All kits include a junction valve box, remote manifold and necessary fittings to connect to 1" poly pipe.

- 600194 – 4-Port Manifold \$529.99
- 600254 – 6-Port Manifold \$629.99

### ProAir® Diffusers

Airmax ProAir Weighted Diffusers are designed for maximum oxygen circulation in your pond. The ProAir 2 & ProAir 4 diffusers are weighted to support the diffusers in muck. The membrane sticks have the same effect as air stones but are virtually maintenance free. Each plate comes with a check valve to prevent back pressure to your compressor.

- 1. 510168 – PTFE Non-Stick 6" Weighted Membrane Stick \$38.99
- 610008 – PTFE Non-Stick 6" Membrane Sleeve Only \$19.99
- 2. 490340 – Check Valve \$14.99
- 3. Complete Diffuser
  - 490354 – ProAir 2 Complete Diffuser \$180.00
  - 510166 – ProAir 4 Complete Diffuser \$285.00

### Cabinet Post Mount Kit

Use the Cabinet Post Mount Kit for Shallow Water & PondSeries installations that require the aeration cabinet to be elevated. Constructed of powder-coated aluminum, the mount kit includes mounting bracket and hardware to secure your aeration cabinet to both round or square wooden posts, 4" diameter or larger.

- 652121 – Standard Composite Cabinet Post Mount Kit \$379.99
- 652122 – Large Composite Cabinet Post Mount Kit \$499.99

### Camlock Connector Kit

The Airmax Camlock Connector Kit is designed for fast and easy connections between the compressor manifold hoses and underground airlines. Ideal for PondSeries systems that will be removed for winter months. Camlock Connector Kits can be used with 3/8" or 5/8" airline.

- 510435 – Camlock Connector Kit \$44.99

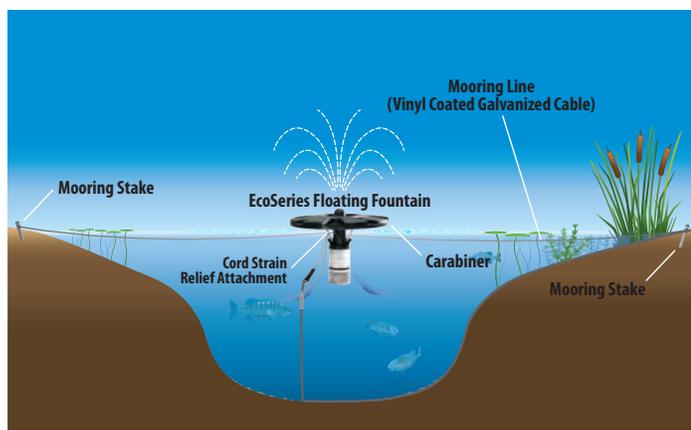

# Fountain

## Parts & Accessories

### Mooring Kit

Prevent your fountain from drifting due to wind and water movements by securing it with a Mooring Kit. Each kit includes all necessary mooring supplies: two stakes, two carabiners, four cable clamps, and your choice of 150', 250' or 500' of black vinyl coated galvanized wire (mooring line).

- 651052 – 150' Mooring Kit, (2) 75' lines \$149.99
- 651054 – 250' Mooring Kit, (2) 125' lines \$189.99
- 651055 – 500' Mooring Kit, (1) 500' line \$269.99

### D-Scale™

D-Scale is a powerful, fast-acting, foaming cleaner that deep cleans and removes limescale, calcium, rust stains and other mineral deposits without scrubbing. This cleaner is 100% biodegradable. Perfect for use on aeration equipment, fountains, spray boats and water pumps.

- #530298 – D-Scale w/ Foaming Tip, 32 fl oz \$31.24
- #530299 – D-Scale, 1 gal \$81.24

# Product Warranty

## Fountains, Compressors & More

### Airmax Aeration, Fountains & Lights

**Warranty:** Airmax, Inc. warrants to the original purchaser (the end user) of any Airmax System manufactured by Airmax, Inc. that any component which proves to be defective in materials or workmanship, as determined by the factory within the timeframe specified below from the shipping date, will be repaired or replaced at no charge with a new or remanufactured part, and returned freight prepaid. The end user shall assume all the responsibility and expense for removal, packaging, and freight to ship to Airmax, Inc. to determine the warranty claim and for all reinstallation expenses.

### Aeration

Aeration systems will have a 3-year warranty on the compressor, 10-year warranty on the cabinet, and a 5-year warranty on the airline & diffuser. Does not include wear parts.

### Fountains

New complete fountain purchases have a 3-year warranty on the EcoSeries, PondSeries and SolarSeries Fountains, 5-year warranty on LakeSeries fountains.

### Solar Panels

25-year limited warranty. Degradation of solar panels not to exceed 2% in year one and 0.58% annually from years 2 – 30.

### Batteries

For solar aeration: 1-year warranty.

### Lights

3-year warranty.

### Jenlis Weed & Muck Removal Tools

**Warranty:** Jenlis Inc. warrants this product to be free from defects in workmanship and materials, under normal, non-commercial use and conditions, for a period of (1) one year from the original invoice date. Warranty Limitations - Damage resulting from use in commercial environment, misuse, abuse, negligence, and/or accidents. The manufacturer agrees, at its option during the warranty period, to repair any defect in material or workmanship, or to furnish a repaired or refurbished product without charge. All warranty claims must be sent to Airmax, at the dealer's expense. Return shipping will be pre-paid.

Please visit [airmaxeco.com/returns](http://airmaxeco.com/returns) for an RMA number prior to returning the product. Returns without RMAs will be refused.

## Made In The USA

- Engineered and constructed in the USA by skilled professionals.
- Designed to exceed industry standards in efficiency and durability.
- Guaranteed performance, backed by Airmax Warranty.

## Deliver Lasting Pond Performance

Airmax proactive pond solutions ensure ponds and lakes, large and small, remain cleaner, clearer, and more balanced throughout every season.

Proactive solutions like aeration prevent common pond problems from taking over, reduce routine maintenance needs, and provide lasting balance and clarity.

# C.A.S.T. Training
